

QUAD-PLATE CHILLER

BATCH COOLING WATER CHILLERS FOR BAKERY APPLICATIONS

**PROVIDING AUTOMATIC WATER TEMPERATURE CONTROL
FOR THE MODERN BAKING INDUSTRY**

STANDARD FEATURES:

- ◆ Outlet temperatures down to 34°F.
- ◆ For up to 288 gallons of chilled water per hour.
- ◆ 120-gallon storage capacity.
- ◆ Batch draw-off flow rates to 20 gallons per minute.
- ◆ Inlet temperatures up to 80°F.
- ◆ Process and recirculation pump standard.
- ◆ 5 hp to 15 hp remote condensing units available.
- ◆ Adjustable digital temperature control with °F or °C display.
- ◆ CSA/US pending.

PERFORMANCE SPECIFICATIONS

Model Number	Batches Per Hour	Gallons Per Batch	Inlet Temp. (°F)	Outlet Temp. (°F)	Draw Off Flow Rate (gpm)	Refill Flow Rate (gpm)	HP	Control Voltage	Condensing Unit Voltage	Storage Tank Capacity (gal)
QPPK-005	4	28	70	34	20	20	5	208-230/60/1	208-230/60/1	120
QPPK-008	4	42	70	34	20	20	7.5	208-230/60/1	208-230/60/3	120
QPPK-008	8	21	70	34	20	20	7.5	208-230/60/1	208-230/60/3	120
QPPK-010	4	48	70	34	20	20	10	208-230/60/1	208-230/60/3	120
QPPK-010	8	24	70	34	20	20	10	208-230/60/1	208-230/60/3	120

NOTES:

1. All of the above units consist of a quad-plate heat exchanger, storage tank, on/off and temperature controls, chiller circulation pump, building supply pump, water piping, and refrigeration controls — all pre-piped, wired, and mounted on a skid.
2. The condensing units for the above chillers are all shipped loose for outdoor installation. The refrigeration piping and refrigerant charge must be supplied by others.
